

## **Jack Sim**

### **Personal Bio:**

Jack broke the global taboo of toilet and sanitation by bringing it to global media centre-stage with his unique mix of humour and serious facts since 2001.

After attaining financial independence at age of 40 as a businessman, he decided to devote the rest of his life to social work.

He established the Restroom Association of Singapore (RAS) in 1998, which addresses the state of dirty public toilets in designs, building codes and poorly trained cleaners. Realising the need for a global body on the subject, Jack created the World Toilet Organization (WTO) in 2001 as a global network and service platform for toilet associations, academia, government, UN agencies and toilet stakeholders to learn from one another and leverage media and corporate support that in turn influenced governments to promote sound sanitation and public health policies. Since its inception, WTO organized ten World Toilet Summits and two World Toilet Expo and Forum straddling Singapore, Seoul, Taipei, Beijing, Belfast, Moscow, New Delhi, Macau, Shanghai and Bangkok. In 2010, World Toilet Summit goes to Philadelphia.

Today, WTO is a growing network of 235 organizations in 58 countries.

World Toilet Organization declared its founding day 19 November in 2001, as World Toilet day and this is now

celebrated worldwide each year towards improving the state of toilets and sanitation globally.

In 2004, he was awarded the inaugural Singapore Green Plan Award by Singapore's National Environment Agency for contribution to Environment.

In 2005, Jack founded the World Toilet College to provide high quality training in Toilet Design, Maintenance, Cleanliness and Ecological Sanitation Technologies. The college is a joint venture with the Singapore Polytechnic.

The same year 2005, he successfully lobbied for potty parity and changed the Singapore's building codes to have more cubicles in ladies restrooms so they never have to queue up for the restrooms. US Congress passed a similar law in 2010.

He holds a Post-Graduate Diploma in International Marketing from University of Strathclyde.

For his social cause on sanitation, he studied in Norway University of Life Science, the Stockholm Environment Institute, Uppsala University, Linkoping University, Karolinska University, Harvard Business School, and Harvard Kennedy School.

In 2006, Jack won the Social Entrepreneur of the Year awarded by Schwab Foundation of Switzerland. He is now a Schwab Fellow of the World Economic Forum.

In 2007, Jack became one of the key members to convene the Sustainable Sanitation Alliance comprised of key players for sanitation. Members include UN-Habitat, UNESCO,

UNICEF, UNDP, World Bank, World Sanitation Financing Facility and several other international groups working together to improve sanitation for all. He heads its Asian Secretariat in Singapore.

The same year, he also became the first Singaporean elected to be an Ashoka Global Fellow.

Asian Development bank names him an ADB Water Champion.

In 2008, Jack was appointed a Council Member to the World Economic Forum's Global Agenda Council for Water Security and the GAC for Social Entrepreneurship.

Time Magazine also named him Hero of the Environment in 2008.

WTO has a commitment with President Clinton at the Clinton Global Initiatives to promote market-based sanitation.

Channel News Asia named him Asian of the Year 2009.

He is now developing a SaniShop franchise model to teach the poor how to produce and how to sell small affordable sanitation systems below U\$40 per family with the support of Index Award, Rockefeller and Singapore Economic Development Board.

In 2010, he joins the board of World Entrepreneurship Forum (under patronage of President Sarkozy) and heads its Base of Pyramid Entrepreneurship (BOP) drive to bring trade to poverty sector as a sustainable way out of poverty.

His new ventures also include BOP HUB in Singapore as a world trade centre for the 4 billion poverty marketplaces.

In his free time, he designs and builds public arts sculptures and mobilizes volunteers to build an 10 acres Kampung Temasek, an eco-village in Malaysia.
